Hiring trends for 2019

Planning to decrease the size of their tech team in 2019:
- Yes: 86%
- No: 10%
- Unsure: 4%

Planning to recruit IT techs in 2019:
- Yes: 77%
- No: 23%

The biggest reason for decreasing the size of the tech team is improved efficiency & productivity. Projects coming to an end and outsourcing were the other two main drivers from IT employers.

New projects kicking off is the primary driver for the need to recruit techs in 2019, followed by the replacement of staff and an increased demand of IT by the business.

Remote working in NZ - the employers' perspective

What does remote working look like for NZ employers?

- 17%: All work/meetings done remotely
- 66%: Mix of working remotely and coming into the office at agreed times
- 17%: Mix of working remotely and coming into a shared space/satellite office

- 46% of IT employers have remote staff in their business
- 5% of IT employers who do not have remote workers at present plan to offer remote working in 2019, mainly to retain their tech staff who want to work remotely.
- Top three reasons why IT employers are currently offering remote working is firstly to retain their tech staff who want to work remotely, secondly to cut overhead costs and thirdly to attract IT talent from across New Zealand.
- The majority of IT employers (55%) state that the biggest benefit of remote working are happy, motivated workers.
- 57% of IT employers say that the biggest drawback of remote working is the loss of personal connection with their team members.
When asked if interns added value to their business, the overwhelming majority (95%) replied yes. IT employers found them to be motivated and hard working with fresh ideas and different/new points of view. The Summer of Tech programme was regularly cited as a source of great tech interns who were productive and brought diversity and new thinking to their teams.

IT employers also said that if you plan and focus your internship programme well, you will get maximum benefit from it. Many also said that it was a cost effective way to get access to tech talent and 79% of IT employers who had interns in the past went on to employ them.

IT employers who do not currently have an internship programme cited the following reasons:
- No real business need for interns
- Not enough resources to provide supervision/training
- Need highly skilled workers at this time
- Time constraints
- Not something they have done before
- Company policy constraints
